Portfolio Commentary

The continued rise in inflation expectations through the quarter saw Central Banks pursue more aggressive monetary tightening, increasing the risk of a recession in the next 12 months. The magnitude of this downturn depends on where inflation goes from here, and there are early signs of prices easing in some areas (such as commodities). However, there are still concerns about energy prices, given the ongoing conflict in Ukraine, and wage expectations and the risk of heightened inflationary expectations becoming entrenched. From a corporate perspective, newsflow remains broadly in-line, albeit with heightened caution in outlook statements. Forecasts would appear to be being set cautiously, but until there is more economic certainty, the market will remain “risk-off” and sceptical of forward earnings projections. From a positive perspective, employment levels remain high, supply chains continue to ease, and both household and corporate balance sheets are strong, all of which should provide support to economic activity.

Dividends have continued to return to pre-pandemic levels, helping the portfolio dividend yield increase further following the rise in Q1. While earnings may come under pressure over the next 12 months, pay-out ratios are at a sensible level, which combined with strong balance sheets, should give investors confidence in a continued attractive yield.

For the second quarter of 2022, the Income Portfolio performance

was underpinned by positive gains from EMIS (+42.0%) and Appreciate (+27.7%), whilst Portmeirion (-31.3%) and Mortgage Advice Bureau (-20.0%) detracted from performance.

Portmeirion announced growth in sales and gross margin on the prior year in their annual general meeting (AGM) statement in May, but, as a H2-weighted business, they highlighted caution about the outlook, given changing consumer sentiment and heightened cost of living, despite healthy order books.

Mortgage Advice Bureau was also down for the quarter, with the share price falling on concerns about what rising rates might mean for the UK housing market. At their AGM in May, they announced that current trading was in-line with expectations, and their mortgage completions in Q1 were up 11% on the prior year.

EMIS was the standout performer, as they announced a recommended bid for the company at a 49% premium to the prior days close. The potential acquirer is Optum UK, a healthcare software, services, and consultancy business, who are looking to enhance their technology offering for the UK market.

Appreciate was also strong, with a positive year-end update driving earnings upgrades, as they saw accelerated redemption of vouchers and continued improvement in Christmas Savings.

Exposure by Industry^{1,2}

Exposures by Market Capitalisation (£m)¹

The Income Portfolio currently contains 20 equally weighted stocks with an average market capitalisation of £280.7 million.
